https://github.com/Mandi-Lekalakala

https://mandi-lekalakala.netlify.app/

Frontend developer with a proven track record of delivering real-world web solutions from brief to deployment. Built and launched live projects — including Jobify, an AI-powered CV and cover letter generator and Amanda's Beauty Bar, a fully functional mobile-first client website with an online booking system. Currently serving as the sole Web Developer at Cuibaxe Poultry Farm, owning the full website build and digital presence end-to-end alongside active freelance client work. Skilled in React, JavaScript (ES6+), HTML5/CSS3, REST API integration, and Git-based collaborative workflows. I am self-directed, and comfortable communicating across distributed teams.

Feel free to connect and check out my portfolio!

PROFESSIONAL & TECHNICAL SKILLS

Core: HTML5, CSS3, JavaScript (ES6+), React, REST APIs, Git, GitHub, Foundational Python & SQL

UI/UX: Responsive Design, Mobile-First Development, Cross-Browser Testing, Chrome DevTools

TECHNICAL PROJECTS

Amanda's Beauty Bar | HTML · CSS · JavaScript · UI/UX

- Built and deployed a mobile-first client website with a fully functional booking form and polished responsive UI, delivered end-to-end from client brief to live deployment.
- Live: <https://amandas-beauty-bar.netlify.app/>

Jobify – AI Job Application Assistant | HTML · CSS · JavaScript · SheCodes AI API

- AI-powered mini SaaS app that helps users generate CVs and cover letters through a chat-style interface built with prompt engineering and SheCodes API integration, with clean responsive UI and error handling.
- Live: <https://mandi-lekalakala.github.io/jobify-chatbox-generator/>

SkyCast Weather App | HTML · CSS · JavaScript · SheCodes Weather API

- Fully functional weather app pulling live data from the SheCodes weather API, with dynamic UI updates based on location input, contains dynamic UI updates based on real-time API data and location input.
- Live: <https://mandi-lekalakala.github.io/skycast-weather-app/>

PROFESSIONAL EXPERIENCE

Web Developer | Cuibaxe Poultry Farm

Jan 2026 – Present

- Leading end-to-end design and development of the company's official website — translating business goals and brand identity into a professional web presence from planning and wireframing through to deployment.
- Serving as the sole technical point of contact, owning all web and digital responsibilities including maintenance, updates, and performance monitoring while communicating clearly with non-technical stakeholders.
- Managing the company's social media and digital presence alongside the website build, ensuring consistent brand representation and supporting growing online visibility in the agricultural sector.

Freelance Frontend Developer | Client Projects

June 2025 – present

- Designed and developed a mobile-first website for Amanda's Beauty Bar with a fully functional booking form — delivered end-to-end from requirements gathering through to deployment.
- Currently building a business website for an agricultural production client, working directly with stakeholders to translate business requirements into a clean, structured frontend solution

Junior Web Developer BootCamp | SheCodes

Aug 2024 – May 2025

- Built responsive websites and interactive web applications using HTML, CSS, JavaScript, and React.
- Developed Jobify — an AI-powered job application chatbot using the SheCodes API, integrating prompt logic, API calls, and error handling into a clean responsive UI.
- Debugged and managed project layouts and JavaScript issues using Chrome DevTools across multiple browsers and devices.

Online English Tutor | Preply

Aug 2023 – May 2024

- Delivered structured lessons to 15+ international students across US and European time zones.
- Adapted communication styles to diverse learning needs, explaining complex concepts to non-native speakers.
- Provided live technical troubleshooting support to US and European customers during sessions
